SUMMARY

Software Engineer specializing in enterprise architectures and modern web technologies. Experienced in IBM i systems, database-driven applications (DB2, SQL), and full-stack development (MERN). Actively seeking full-time roles and internships to leverage cross-functional expertise in solving complex technical challenges at scale.

SKILLS

- **Languages:** Java, Python, JavaScript, SQL, C++
- **Enterprise & Mainframe:** IBM i, AS/400, ILE-RPG, CL-Programming, CICS, JCL, COBOL, DB2
- **Web Development:** MERN Stack (MongoDB, Express.js, React.js, Node.js), REST APIs
- **Core Concepts:** Data Structures & Algorithms, Object-Oriented Programming, DBMS, System Design
- **Tools & Cloud:** Git, GitHub, VS Code, Vercel, Render

EXPERIENCE

Infosys Ltd — Systems Engineer (IBM i)

Nov 2025 – Present

- Architected and maintained enterprise backend solutions on the IBM i platform for Sally Beauty, managing large-scale Warehouse Management System (WMS) operations.
- Optimized legacy COBOL/RPG programs and executed complex DB2 SQL queries, improving real-time inventory tracking accuracy and reducing batch processing time by 20%.
- Resolved critical system incident tickets and streamlined warehouse logistics data flow, decreasing system downtime by 15% during peak operational hours.

PROJECTS

- **QuickCart E-Commerce System — MERN Stack, Razorpay**
 - Developed a robust, full-stack e-commerce architecture with seamless authentication, dynamic product cataloging, and secure Razorpay payment gateway integration.
 - Designed efficient RESTful APIs and optimized MongoDB indexing, enabling the platform to handle 500+ concurrent user transactions with 99.9% uptime.
- **RAG-Based AI Teaching Assistant — Python, LangChain, Vector DB**
 - Architected a Retrieval-Augmented Generation (RAG) system indexing extensive data science course transcripts to provide highly accurate, context-aware student support.
 - Integrated LLM APIs and optimized vector embeddings, reducing average student query resolution time by 75%.
- **Regional Developer Analytics (Coders of Delhi & Bangalore) — Python, Pandas**
 - Executed exploratory data analysis (EDA) on regional developer datasets, utilizing Python libraries to extract demographic and compensation insights.
 - Visualized complex technical skill-set trends, demonstrating proficiency in data cleaning and statistical modeling.

EDUCATION

B.Tech in Information Technology (Minor in Software Development)

CGPA: 9.05 — 2021–2025

Dr. Akhilesh Das Gupta Institute of Technology & Management

ACHIEVEMENTS & INVOLVEMENT

- **Competitive Programming:** Actively solve algorithmic challenges on LeetCode and GeeksforGeeks, applying advanced Data Structures and Algorithms for interview preparation.
- **Leadership & Aptitude:** Shortlisted for the highly competitive Service Selection Board (SSB) interviews for technical and officer roles in the Indian Armed Forces.
- **Olympiad Medalist:** Secured Gold in the National Science Olympiad, and Silver in both the International Mathematics and National Cyber Olympiads.
